“**ABOUT US**”

Al Buad Environmental aims to be a trusted partner in environmental consulting across the Kingdom of Saudi Arabia and beyond. We are more than a consulting firm: our team brings together qualified local and international specialists with broad experience and a clear, integrated perspective.

We deliver environmental services and consultancy that include environmental permitting, environmental impact assessment, sustainability, and indoor and outdoor air quality. Our work focuses on practical solutions that improve environmental performance and quality of life.

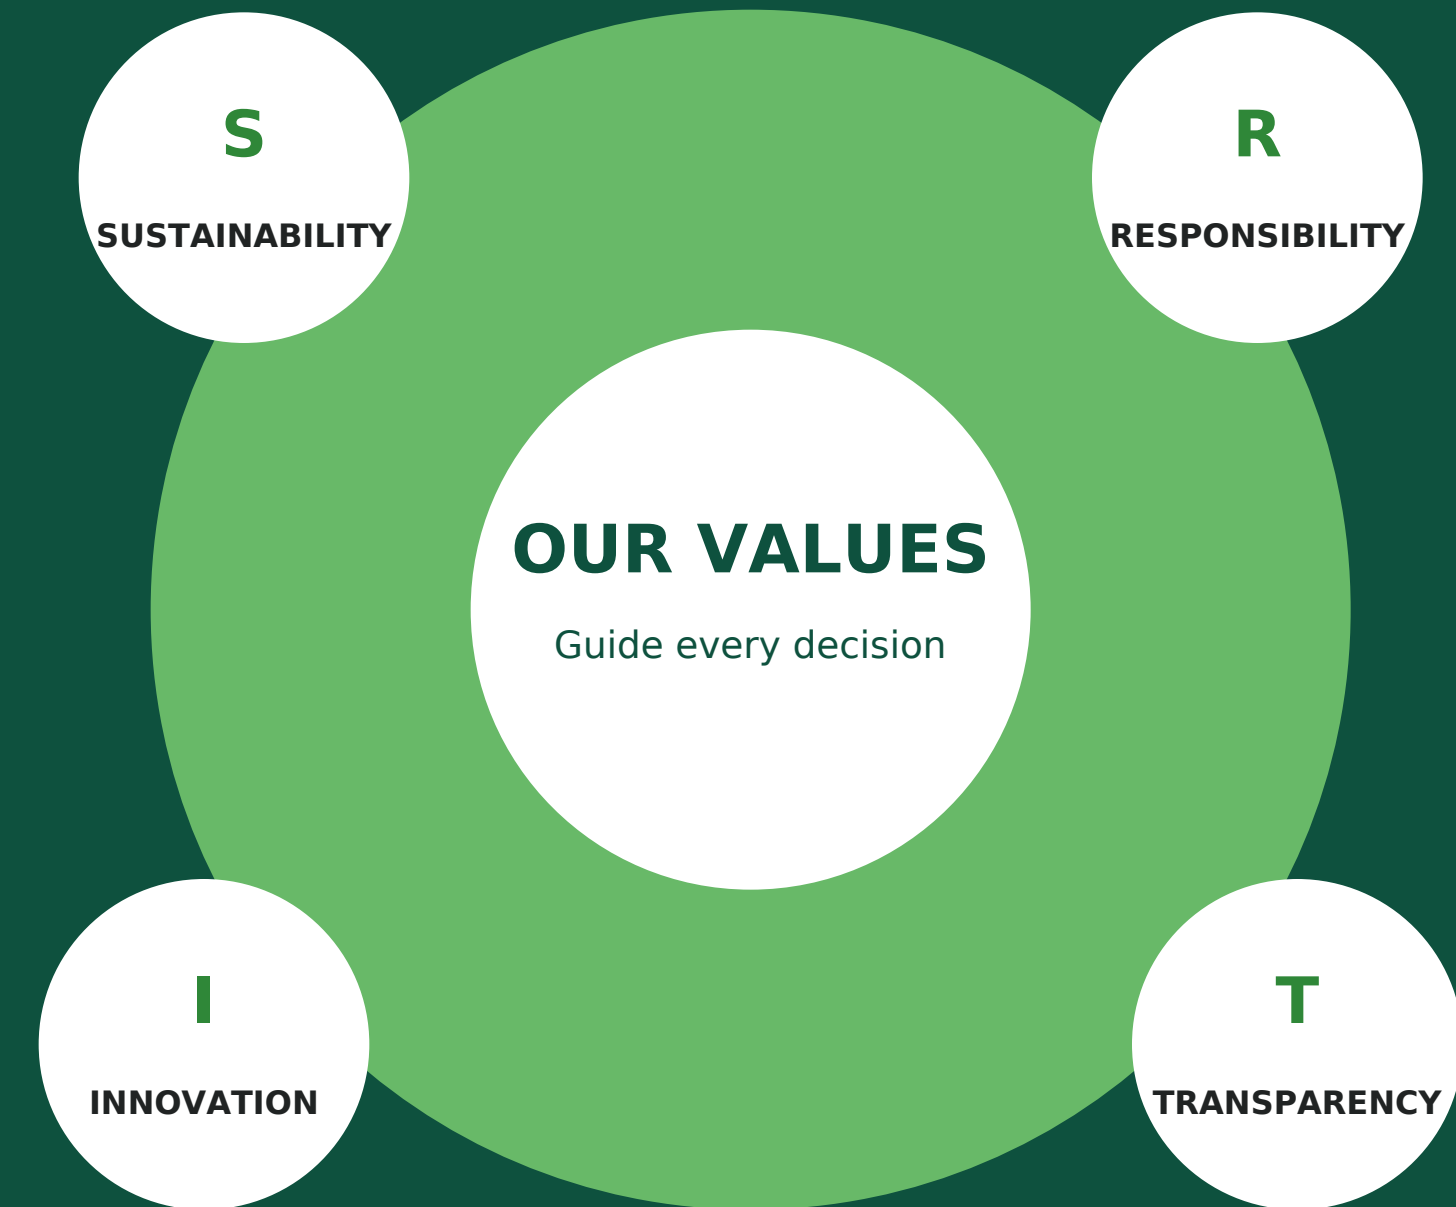

We believe that economic development and environmental stewardship belong together. That is why we work to create a balanced path toward a better future for people, communities and the environment.

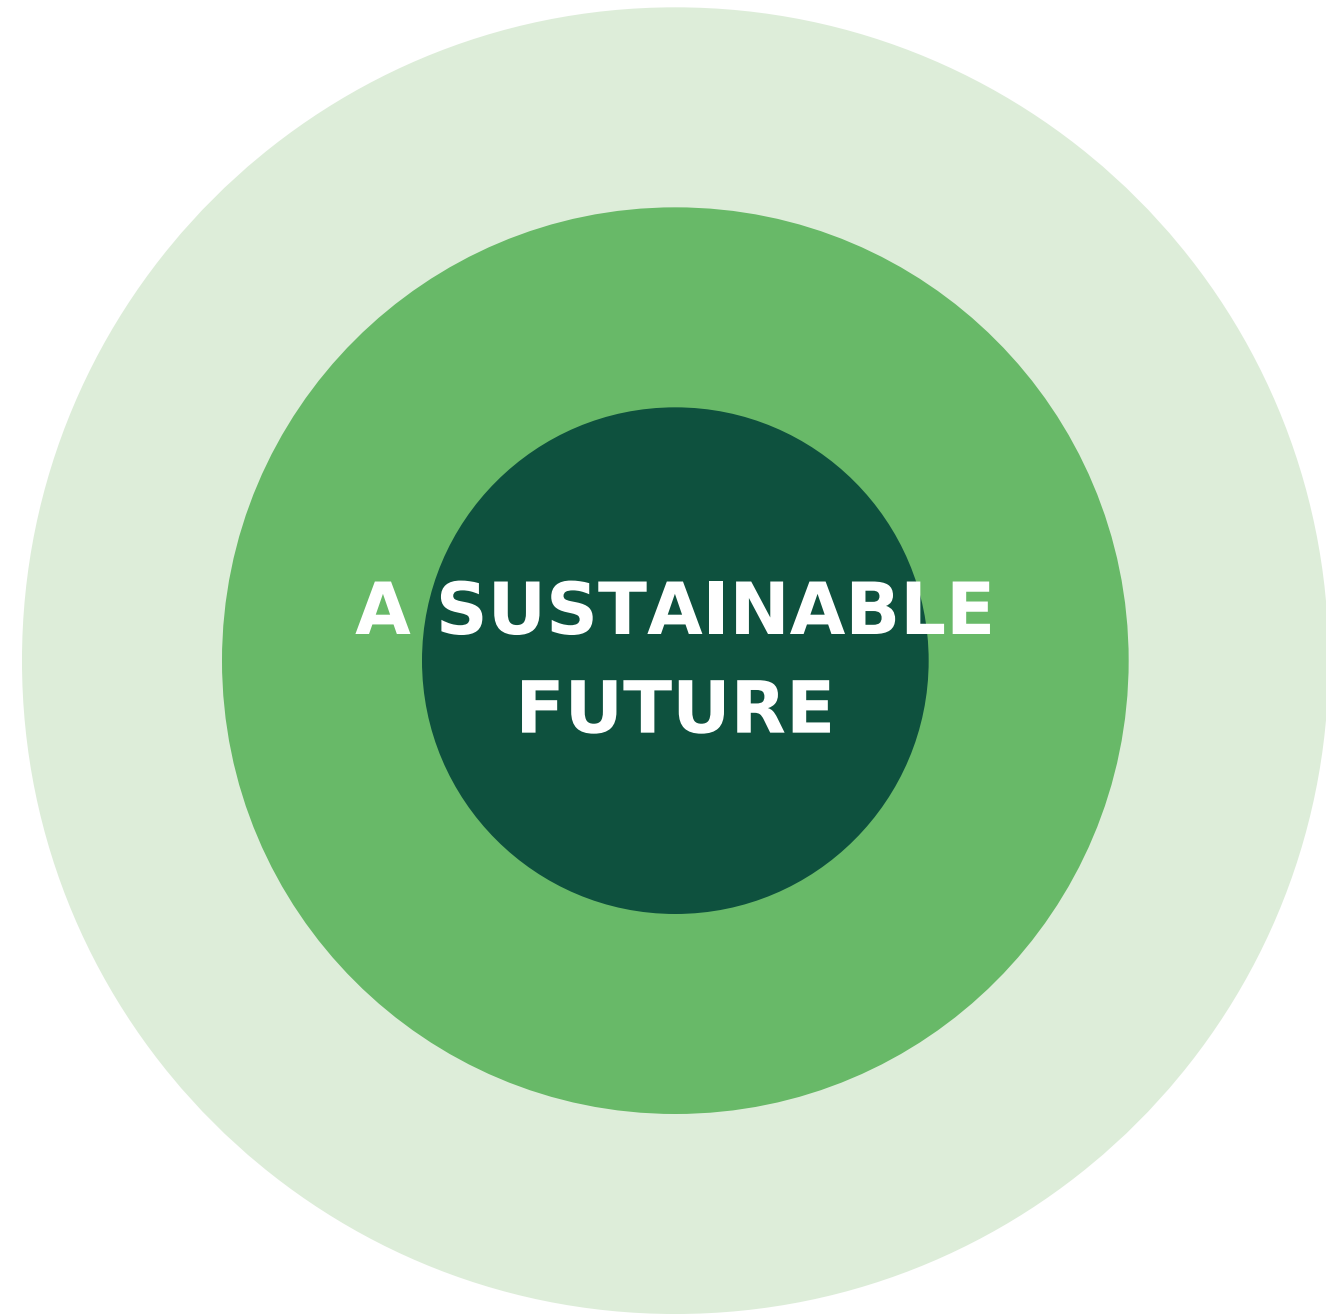

MISSION

We provide integrated environmental solutions and consulting that support sustainable development. By combining local insight with international expertise and maintaining high standards of quality and transparency, we help organisations protect the environment, enhance quality of life and balance economic growth with the conservation of natural resources.

Our mission is to be a committed partner in building a more sustainable future.

OUR VISION

To be a leading and trusted environmental consulting company that contributes to a sustainable future and a healthy, balanced society living in harmony with nature.

We seek to open new paths for environmental innovation and to deliver our services with transparency and clarity. Through innovative solutions, advanced environmental studies and continuous improvement, we aim to strengthen sustainable development goals and support initiatives that create real value for communities and the environment.
